anti-Junctophilin 3 antibody (C-Term)

2 Images

Overview

Alternative Name:

Quantity:	0.1 mg
Target:	Junctophilin 3 (JPH3)
Binding Specificity:	C-Term
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Junctophilin 3 antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Enzyme
	Immunoassay (EIA)
Product Details	
Immunogen:	JPH3 antibody was raised against a 18 amino acid peptide near the carboxy terminus of
	human JPH3.
Isotype:	IgG
Specificity:	This antibody detects JPH3 at C-term.
Purification:	Peptide affinity chromatography
Target Details	

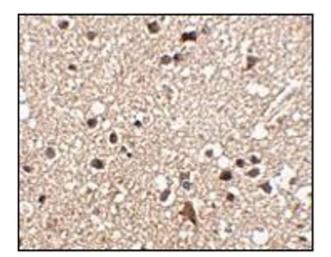

Junctophilin-3 / JPH3 (JPH3 Products)

Target Details

Storage Comment:

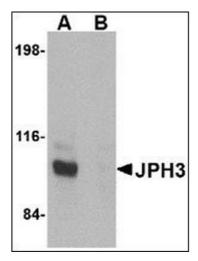

Background:	Junctional complexes between the plasma membrane (PM) and endoplasmic/sarcoplasmic
	reticulum (ER/SR) are a common feature of all excitable cell types and mediate cross talk
	between cell surface and intracellular ion channels. Junctophilins (JPs) are important
	components of the junctional complexes. JPs are composed of a carboxy-terminal
	hydrophobic segment spanning the ER/SR membrane and a remaining cytoplasmic domain
	that shows specific affinity for the PM. Four JPs have been identified as tissue-specific
	subtypes derived from different genes: JPH1 is expressed in skeletal muscle, JPH2 is detected
	throughout all muscle cell types, and JPH3 and JPH4 are predominantly expressed in the brain.
	In the CNS, both JPH3 and JPH4 are expressed throughout neural sites and contribute to the
	subsurface cistern formation in neurons. Mice lacking both JPH3 and JPH4 subtypes exhibit
	serious symptoms such as impaired learning and memory and are accompanied by abnormal
	nervous functions. A repeat expansion in JPH3 is associated with Huntington disease-like 2. At
	least two isoforms of JPH3 are known to exist. Synonyms: JP3, Junctophilin type 3, TNRC22,
	Trinucleotide repeat-containing gene 22 protein
Gene ID:	57338
NCBI Accession:	NP_065706
UniProt:	Q8WXH2
Application Details	
Application Notes:	ELISA. Western blot. Immunohistochemistry on paraffin sections.
	Other applications not tested.
	Optimal dilutions are dependent on conditions and should be determined by the user.
Restrictions:	For Research Use only
Handling	
Buffer:	PBS containing 0.02 % sodium azide
Preservative:	Sodium azide
Precaution of Use:	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which
	should be handled by trained staff only.
Handling Advice:	Avoid repeated freezing and thawing.
Storage:	4 °C/-20 °C

Store at 2 - 8 °C for up to one month or (in aliquots) at -20 °C for longer.

Immunohistochemistry (Paraffin-embedded Sections)

Image 1. Immunohistochemistry of JPH3 in human brain tissue with this product at $2.5 \, \mu g/ml$.

Western Blotting

Image 2. Western blot analysis of JPH3 in Daudi cell lysate with this product at 1 μ g/ml in (A) the absence and (B) the presence of blocking peptide.
