anti-EPH Receptor B1 antibody (pTyr928) (AbBy Fluor® 680)

Go to Product page

Overview	
Quantity:	100 μL
Target:	EPH Receptor B1 (EPHB1)
Binding Specificity:	pTyr928
Reactivity:	Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This EPH Receptor B1 antibody is conjugated to AbBy Fluor® 680
Application:	Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))
Product Details	
Immunogen:	KLH conjugated synthetic phosphopeptide derived from human EphB1 around the phosphorylation site of Tyr928
Isotype:	IgG
Cross-Reactivity:	Mouse, Rat
Predicted Reactivity:	Human
Purification:	Purified by Protein A.
Target Details	
Target:	EPH Receptor B1 (EPHB1)

Target Details

Alternative Name:	Eph receptor B1 (EPHB1 Products)
Background:	Synonyms: ELK, NET, Hek6, EPHT2, Ephrin type-B receptor 1, EPH tyrosine kinase 2, EPH-like
background.	kinase 6, EK6, Neuronally-expressed EPH-related tyrosine kinase, Tyrosine-protein kinase
	receptor EPH-2, EPHB1
	Background: Receptor tyrosine kinase which binds promiscuously transmembrane ephrin-B
	family ligands residing on adjacent cells, leading to contact-dependent bidirectional signaling
	into neighboring cells. The signaling pathway downstream of the receptor is referred to as
	forward signaling while the signaling pathway downstream of the ephrin ligand is referred to a
	reverse signaling. Cognate/functional ephrin ligands for this receptor include EFNB1, EFNB2
	and EFNB3. During nervous system development, regulates retinal axon guidance redirecting
	ipsilaterally ventrotemporal retinal ganglion cells axons at the optic chiasm midline. This
	probably requires repulsive interaction with EFNB2. In the adult nervous system together with
	EFNB3, regulates chemotaxis, proliferation and polarity of the hippocampus neural progenitors
	In addition to its role in axon guidance plays also an important redundant role with other ephrir
	B receptors in development and maturation of dendritic spines and synapse formation. May
	also regulate angiogenesis. More generally, may play a role in targeted cell migration and
	adhesion. Upon activation by EFNB1 and probably other ephrin-B ligands activates the
	MAPK/ERK and the JNK signaling cascades to regulate cell migration and adhesion
	respectively.
Gene ID:	2047
UniProt:	P54762
Pathways:	RTK Signaling
Application Details	
Application Notes:	IF(IHC-P) 1:50-200
	IF(IHC-F) 1:50-200
	IF(ICC) 1:50-200
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 μg/μL

Handling

Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
