### Target Details

homolog 1 endonuclease Drosophila, Gen homolog 1 endonuclease, GEN_HUMAN, GEN1. Background: Endonuclease which cleaves flap structures at the junction between single- stranded DNA and double-stranded DNA. Specific for 5'-overhanging flap structures in which the 5'-upstream of the flap is completely double-stranded. Prefers the blocked-flap structures similar to those occurring at replication forks, in which the 5' single-strand overhang of the flap is double-stranded.
