Background:	<ul> <li>Synonyms: ATS, GLUT10, Solute carrier family 2, facilitated glucose transporter member 10,</li> <li>Glucose transporter type 10, GLUT-10, SLC2A10</li> <li>Background: Defects in SLC2A10 are the cause of arterial tortuosity syndrome (ATS)</li> <li>[MIM:208050]. ATS is an autosomal recessive disorder characterized by tortuosity and</li> <li>elongation of major arteries, often resulting in death at young age. Other typical features include</li> <li>aneurysms of large arteries and stenosis of the pulmonary artery, in association with facial</li> <li>features and several connective tissue manifestations such as soft skin and joint laxity.</li> <li>Histopathological findings include fragmentation of elastic fibers in the tunica media of large</li> <li>arteries.</li> </ul>
