Background:	Synonyms: HMG14 phospho S21 + S25, High mobility group nonhistone chromosomal protein 14, High mobility group nucleosome binding 1, High mobility group nucleosome binding domain containing protein 1, High mobility group protein 14, High-mobility group nucleosome binding domain 1, HMG14, HMGN 1, HMGN1, MGC104230, MGC117425, Nonhistone chromosomal protein HMG-14, Nonhistone chromosomal protein HMG14, FLJ27265, FLJ31471. Background: Chromosomal protein HMG14 binds to the inner side of the nucleosomal DNA, thus altering the interaction between the DNA and the histone octamer and is involved in the process that maintains transcribable genes in an appropriate chromatin conformation. HMG14 has been implicated as a contributing factor in the etiology of Down syndrome.
