Target Details	
Alternative Name:	PTK7 / CCK4 (PTK7 Products)
Background:	Protein-tyrosine kinases (PTKs) play important roles in regulating cell proliferation and
	differentiation during development. One member of the PTK family, PTK7, has been suggested
	to regulate the planar cell polarity (PCP) pathway in vertebrates and may play a role in neural
	convergent extension and neural tube closure. PTK7 has also been implicated in the
	development of cancer. Loss of PTK7 expression was seen in several melanoma cell lines and
	biopsies. Conversely, high-throughput analysis of acute myeloid leukemia samples showed an
	increased level of PTK7 expression compared to normal bone marrow and purified CD34+ cells.
	Multiple isoforms of PTK7 are known to exist.Synonyms: CCK-4, Colon carcinoma kinase 4,
	Tyrosine-protein kinase-like 7
Gene ID:	5754
