Datasheet for ABIN5005733 anti-kappa Light Chain antibody (AA 1-60) (Alexa Fluor 680)

Overview

Quantity:	100 μL
Target:	kappa Light Chain
Binding Specificity:	AA 1-60
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This kappa Light Chain antibody is conjugated to Alexa Fluor 680
Application:	Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))

Product Details

Immunogen:	Purified human Kappa light chain
Isotype:	IgG
Cross-Reactivity:	Mouse
Predicted Reactivity:	Human
Purification:	Purified by Protein A.

Target Details

Target:	kappa Light Chain
Abstract:	kappa Light Chain Products

Target Details	
Background:	Synonyms: HCAK 1, HCAK1, Ig kappa chain C region, IGKC, Immunoglobulin kappa constant,
	Immunoglobulin kappa constant region, Immunoglobulin kappa light chain, Kappa 1
	immunoglobulin light chain, Km, MGC111575, MGC62011, MGC72072, MGC88770, MGC88771, MGC88809.
	Background: Immunoglobulins belong to a group of related glyco proteins which make up 20 $\%$
	of serum proteins. Antigens and immunoglobulins react to confer immunity to individuals.
	Immunoglobulins have similar structures of two identical heavy chains and two identical light
	chains. Both the heavy chains and the light chains are divided into constant and variable
	regions. The constant regions have the same amino acid sequences between all the
	immunoglobulin classes. The variable regions have approximately 110 amino acids with high
	sequence variability. The amino acid sequence of the heavy chain determines the class of an
	immunoglobulin. The five types of immunoglobulin heavy chains are known as: IgG, IgA, IgM,
	IgD, and IgE. IgG is divided into four subclasses, and IgA is divided into two subclasses. In
	serum IgA and IgG are monomers with a single 4 polypeptide unit, while, IgM is a pen tamer.
	IgA may also form polymers. Kappa light chain antibody can be used for the identification of
	leukemias, plasmacytomas and certain non Hodgkin's lymphomas. Kappa light chain contains
	one immunoglobulin like domain. The EU sequence has the INV allotypic marker, Ala 45 and Val
	83. The ROY sequence has the INV allotypic marker, Ala 45 and Leu 83.
Gene ID:	10520
Application Details	
Application Notes:	IF(IHC-P) 1:50-200
	IF(IHC-F) 1:50-200
	IF(ICC) 1:50-200
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 μg/μL

Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.	
Preservative:	ProClin	
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be
