## Datasheet for ABIN5005846 anti-KERA antibody (AA 201-300) (Alexa Fluor 750)

Overview

| Quantity:            | 100 μL   |  |
|----------------------|--|--|
| Target:              | KERA   |  |
| Binding Specificity: | AA 201-300   |  |
| Reactivity:          | Human, Mouse   |  |
| Host:                | Rabbit   |  |
| Clonality:           | Polyclonal   |  |
| Conjugate:           | This KERA antibody is conjugated to Alexa Fluor 750  |  |
| Application:         | Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |  |

## Product Details

| Immunogen:            | KLH conjugated synthetic peptide derived from human Keratocan |  |
|-----------------------|---|--|
| Isotype:              | lgG   |  |
| Cross-Reactivity:     | Human, Mouse  |  |
| Predicted Reactivity: | Rat,Dog,Cow,Sheep,Pig,Horse                                   |  |
| Purification:         | Purified by Protein A.  |  |
| Target Details        |   |  |
| Target:               | KERA  |  |

| Target.           |                           |
|-------------------|---------------------------|
| Alternative Name: | Keratocan (KERA Products) |

| Target Details      |  |  |
|---------------------|--|--|
| Background:         | Synonyms: CNA2, KERA, KERA_HUMAN, Keratan sulfate proteoglycan keratocan, Keratocan,<br>KTN, SLRR2B.               |  |
|                     | Background: Small leucine-rich proteoglycans (SLRPs) such as Decorin, Biglycan, Fibromod-                          |  |
|                     | ulin, Keratocan, Lumican and Osteoglycin mediate extracellular matrix organization and are                         |  |
|                     | binding partners of TGF Beta. The Decorin core protein binds to growth factors, intercellular                      |  |
|                     | matrix molecules such as Fibronectin and Throm-bospondin, and to the Decorin endocytosis                           |  |
|                     | receptor. Fibromodulin is a collagen-binding keratan sulphate proteoglycan that influences                         |  |
|                     | adhesion processes of connective tissue and plays a role in fibrillogenesis by regulating                          |  |
|                     | collagen fibril spacing and thickness. Keratocan (KTN) develops corneal transparency and                           |  |
|                     | maintains the stromal matrix structure. Keratocan is a secreted protein in the extracellular                       |  |
|                     | matrix that binds to keratan sulfate chains. Keratocan is mainly detected in the cornea, but can                   |  |
|                     | also be expressed in trachea, intestine, ovary, lung and skeletal muscle. Defects in the gene                      |  |
|                     | encoding for Keratocan can cause cornea plana 2 (CNA2), an autosomal recessive disorder                            |  |
|                     | where the forward convex curvature of the cornea is flattened.   |  |
| Pathways:           | Glycosaminoglycan Metabolic Process  |  |
| Application Details |  |  |
| Application Notes:  | IF(IHC-P) 1:50-200   |  |
|                     | IF(IHC-F) 1:50-200   |  |
|                     | IF(ICC) 1:50-200   |  |
| Restrictions:       | For Research Use only  |  |
| Handling            |  |  |
| Format:             | Liquid   |  |
| Concentration:      | 1 μg/μL  |  |
| Buffer:             | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.        |  |
| Preservative:       | ProClin  |  |
| Precaution of Use:  | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only. |  |
|                     |  |  |
| Storage:            | -20 °C   |  |
| Storage Comment:    | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                                  |  |
