| Quantity: | 100 μL |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------|
| Target: | Manic Fringe (MFNG) |
| Binding Specificity: | AA 221-321 |
| Reactivity: | Mouse |
| Host: | Rabbit |
| Clonality: | Polyclonal |
| Conjugate: | This Manic Fringe antibody is conjugated to Alexa Fluor 680 |
| Application: | Flow Cytometry (FACS), Immunofluorescence (Paraffin-embedded Sections) (IF (p)), Immunofluorescence (Cultured Cells) (IF (cc)) |

Product Details

| Immunogen: | KLH conjugated synthetic peptide derived from human Manic Fringe/MFNG |
|-----------------------|-----------------------------------------------------------------------|
| Isotype: | IgG |
| Cross-Reactivity: | Mouse |
| Predicted Reactivity: | Human,Rat,Cow,Sheep,Horse,Chimpanzee |
| Purification: | Purified by Protein A. |

Target Details

| - Target Betano | |
|-------------------|-----------------------------------|
| Target: | Manic Fringe (MFNG) |
| Alternative Name: | Manic Fringe/MFNG (MFNG Products) |

Target Details

| Background: | Synonyms: 3-N-acetylglucosaminyltransferase manic fringe, Beta-1, Beta-1,3-N- | |
|---------------------|----------------------------------------------------------------------------------------------------|--|
| | acetylglucosaminyltransferase manic fringe, MFNG, MFNG_HUMAN, O-fucosylpeptide 3-beta- | |
| | N-acetylglucosaminyltransferase. | |
| | Background: Three mammalian fringe family members, Manic, Radical and Lunatic Fringe, have | |
| | been identified as proteins related to Drosophila fringe, a protein involved in development. | |
| | Fringe proteins act upstream of the Notch signaling pathway and are involved in boundary | |
| | determination during segmentation. Each mammalian fringe displays different patterns of | |
| | expression, though all are expressed in the mouse embryo as well as in many adult tissues. | |
| | Radical fringe plays a key role in the development of the limb bud. Lunatic fringe is required for | |
| | normal somite segmentation and patterning and is thought to be a target of the molecular | |
| | clock. Manic fringe, also involved in somatic development, has been shown to render mouse | |
| | NIH/3T3 cells tumorigenic in SCID mice. | |
| Gene ID: | 4242 | |
| Pathways: | Notch Signaling | |
| Application Details | | |
| Application Notes: | FCM 1:20-100 | |
| | IF(IHC-P) 1:50-200 | |
| | IF(IHC-F) 1:50-200 | |
| | IF(ICC) 1:50-200 | |
| Restrictions: | For Research Use only | |
| Handling | | |
| Format: | Liquid | |
| Concentration: | 1 μg/μL | |
| Buffer: | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and | |
| | 50 % Glycerol. | |
| Preservative: | ProClin | |
| Precaution of Use: | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be | |
| | handled by trained staff only. | |
| Storage: | -20 °C | |
| Storage Comment: | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles. | |
