| Quantity:            | 100 μL                                                                                                  |  |
|----------------------|---------------------------------------------------------------------------------------------------------|--|
| Target:              | MEGF10                                                                                                  |  |
| Binding Specificity: | AA 55-150                                                                                               |  |
| Reactivity:          | Mouse                                                                                                   |  |
| Host:                | Rabbit                                                                                                  |  |
| Clonality:           | Polyclonal                                                                                              |  |
| Conjugate:           | This MEGF10 antibody is conjugated to Alexa Fluor 750                                                   |  |
| Application:         | Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |  |

#### **Product Details**

| Immunogen:            | KLH conjugated synthetic peptide derived from human MEGF10 |  |
|-----------------------|------------------------------------------------------------|--|
| Isotype:              | IgG                                                        |  |
| Cross-Reactivity:     | Mouse                                                      |  |
| Predicted Reactivity: | Human,Rat,Dog,Cow,Sheep,Pig,Horse,Chicken                  |  |
| Purification:         | Purified by Protein A.                                     |  |

#### **Target Details**

| Target:           | MEGF10                   |
|-------------------|--------------------------|
| Alternative Name: | MEGF10 (MEGF10 Products) |

### **Target Details**

| Background:         | Synonyms: MEG10_HUMAN, MEGF protein, megf10, Multiple EGF-like domains protein 10,             |  |
|---------------------|------------------------------------------------------------------------------------------------|--|
|                     | multiple EGF-like-domains 10, Multiple epidermal growth factor-like domains 10, Multiple       |  |
|                     | epidermal growth factor-like domains protein 10.                                               |  |
|                     | Background: MEGF10 is a 1,140 amino acid protein encoded by the human gene MEGF10.             |  |
|                     | MEGF10 belongs to the MEGF family and contains fifteen EGF-like domains and one EMI            |  |
|                     | domain. The engulfment of dying cells is a specialized form of phagocytosis that is highly     |  |
|                     | conserved across evolution and is mediated by the concerted action of several molecules.       |  |
|                     | MEGF10 is an engulfment receptor protein that localizes to the plasma membrane in a            |  |
|                     | punctuated pattern. The MEGF10 protein shares structural similarities with nematode            |  |
|                     | engulfment receptor cell death abnormal-1 (CED-1). MEGF10 function is modulated by the ATP     |  |
|                     | binding cassette transporter ABCA1, which is an ortholog to CED-7. It is expressed at the cell |  |
|                     | surface in clusters around cell corpses during engulfment, and during the engulfment of        |  |
|                     | apoptotic thymocytes is recruited to the bottom of the forming phagocytic cup.                 |  |
| Gene ID:            | 84466                                                                                          |  |
| Pathways:           | Regulation of Muscle Cell Differentiation                                                      |  |
| Application Details |                                                                                                |  |
| Application Notes:  | IF(IHC-P) 1:50-200                                                                             |  |
|                     | IF(IHC-F) 1:50-200                                                                             |  |
|                     | IF(ICC) 1:50-200                                                                               |  |
| Restrictions:       | For Research Use only                                                                          |  |
| Handling            |                                                                                                |  |
| Format:             | Liquid                                                                                         |  |
| Concentration:      | 1 μg/μL                                                                                        |  |
| Buffer:             | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and    |  |
|                     | 50 % Glycerol.                                                                                 |  |
| Preservative:       | ProClin                                                                                        |  |
| Precaution of Use:  | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be            |  |
|                     | handled by trained staff only.                                                                 |  |
| Storage:            | -20 °C                                                                                         |  |
| Storage Comment:    | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.              |  |
|                     |                                                                                                |  |
