	Spindle and kinetochore associated protein 1, Spindle and kinetochore-associated protein 1,
	Spindle and KT kinetochore associated 1, Spindle and KT associated 1, C18orf24, MGC10200.
	Background: Component of the SKA1 complex, a microtubule-binding subcomplex of the outer
	kinetochore that is essential for proper chromosome segregation. Required for timely anaphase
	onset during mitosis, when chromosomes undergo bipolar attachment on spindle microtubules
	leading to silencing of the spindle checkpoint. The SKA1 complex is a direct component of the
	kinetochore-microtubule interface and directly associates with microtubules as oligomeric
	assemblies. The complex facilitates the processive movement of microspheres along a
	microtubule in a depolymerization-coupled manner. In the complex, it mediates the interaction
	with microtubules.
