Target Details

Alternative Name:	Synaptotagmin (SYT Products)
Background:	<p>Synonyms: P65, SYT, SVP65, Synaptotagmin-1, Synaptotagmin I, SytI, SYT1</p> <p>Background: May have a regulatory role in the membrane interactions during trafficking of synaptic vesicles at the active zone of the synapse. It binds acidic phospholipids with a specificity that requires the presence of both an acidic head group and a diacyl backbone. A Ca(2+)-dependent interaction between synaptotagmin and putative receptors for activated protein kinase C has also been reported. It can bind to at least three additional proteins in a Ca(2+)-independent manner, these are neuexins, syntaxin and AP2.</p>
Gene ID:	6857
