| | protein 1Y, Transducin-beta-like protein 1, Transducin-beta-like protein 1, Y-linked. Background: FunctionF-box-like protein involved in the recruitment of the ubiquitin/19S |
| | proteasome complex to nuclear receptor-regulated transcription units. Plays an essential role in |
| | transcription activation mediated by nuclear receptors. Probably acts as integral component of |
| | corepressor complexes that mediates the recruitment of the 19S proteasome complex, leading |
| | to the subsequent proteasomal degradation of transcription repressor complexes, thereby |
| | allowing cofactor exchange. |
