	TBL1Y_HUMAN, Transducin beta like 1, Y linked, Transducin beta-like 1, Transducin beta-like
	protein 1Y, Transducin-beta-like protein 1, Transducin-beta-like protein 1, Y-linked. Background: FunctionF-box-like protein involved in the recruitment of the ubiquitin/19S
	proteasome complex to nuclear receptor-regulated transcription units. Plays an essential role in
	transcription activation mediated by nuclear receptors. Probably acts as integral component of
	corepressor complexes that mediates the recruitment of the 19S proteasome complex, leading
	to the subsequent proteasomal degradation of transcription repressor complexes, thereby
	allowing cofactor exchange.
