Datasheet for ABIN5011556

anti-TXN2 antibody (AA 101-166) (Alexa Fluor 680)

\sim			
	$ \backslash / \cap$	r\/I	\square

Quantity:	100 μL	
Target:	TXN2	
Binding Specificity:	AA 101-166	
Reactivity:	Rat	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	This TXN2 antibody is conjugated to Alexa Fluor 680	
Application:	Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))	

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human Thioredoxin 2	
Isotype:	IgG	
Cross-Reactivity:	Rat	
Predicted Reactivity:	Human,Mouse,Dog,Cow,Pig,Rabbit	
Purification:	Purified by Protein A.	

Target Details

Target:	TXN2
Alternative Name:	Thioredoxin 2 (TXN2 Products)

Target Details

Background: S	Synonyms: mitochondrial thioredoxin, MT-TRX, MTRX, thioredoxin 2 precursor, Thioredoxin
r	mitochondrial, Thioredoxin2, TRX 2, TRX2, TXN 2, TXN2.
E	Background: Thioredoxins (Trx) are small, multi-functional proteins with oxidoreductase activity
6	and are ubiquitous in essentially all living cells. Trx contains a redox-active disulfide/dithiol
Q	group within the conserved Cys-Gly-Pro-Cys active site. The two cysteine residues in the
C	conserved active centers can be oxidized to form intramolecular disulfide bonds. Reduction of
t	he active site disulfide in oxidized Trx is catalyzed by Trx reductase with NADPH as the
ϵ	electron donor. The reduced Trx is a hydrogen donor for ribonucleotide reductase, the essential
ϵ	enzyme for DNA synthesis, and a potent general protein disulfide reductase with numerous
f	functions in growth and redox regulations. Specific protein disulfide targets for reduction by Trx
İ	nclude protein disulfide isomerase(PDI) and a number of transcription factors such as p53, NF-
k	kB and AP-1. Trx is also capable of removing H2O2, particularly when it is coupled with either
r	methionine sulfoxide reductase or several isoforms of peroxiredoxins.
Gene ID: 2	25828
Pathways:	Cell RedoxHomeostasis
Application Details	
Application Notes:	F(IHC-P) 1:50-200
I	F(IHC-F) 1:50-200
l	F(ICC) 1:50-200
Restrictions: F	For Research Use only
Handling	
Format: L	_iquid
Concentration: 1	1 μg/μL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and
Ę	50 % Glycerol.
Preservative: F	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be
ŀ	nandled by trained staff only.
Storage: -	20 °C
