|---------------------|--|
|                     | ZBRK1 plays an important role in transcriptional regulation. Likely targets of gene regulation are   |
|                     | DNA damage response genes, which effect the survival and growth control of cells. ZBRK1  |
|                     | contains an N-terminal KRAB domain, a C-terminal BRCA1-binding region and eight central zinc-<br>fingers.  |
