| Overview             |                                                                              |  |
|----------------------|------------------------------------------------------------------------------|--|
| Quantity:            | 100 μL                                                                       |  |
| Target:              | PRODH                                                                        |  |
| Binding Specificity: | AA 392-599                                                                   |  |
| Reactivity:          | Human                                                                        |  |
| Host:                | Rabbit                                                                       |  |
| Clonality:           | Polyclonal                                                                   |  |
| Conjugate:           | This PRODH antibody is un-conjugated                                         |  |
| Application:         | Western Blotting (WB), Immunohistochemistry (IHC), Immunocytochemistry (ICC) |  |
| Product Details      |                                                                              |  |
| Immunogen:           | PRODH (Arg392-Pro599)                                                        |  |

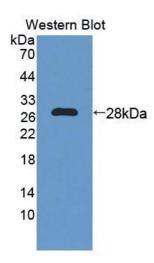

| Immunogen:    | PRODH (Arg392-Pro599)                                                                                                                                                            |  |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Isotype:      | IgG                                                                                                                                                                              |  |
| Specificity:  | The antibody is a rabbit polyclonal antibody raised against PRODH. It has been selected for its ability to recognize PRODH in immunohistochemical staining and western blotting. |  |
| Purification: | Antigen-specific affinity chromatography                                                                                                                                         |  |

### Target Details

| Target:           | PRODH                                                                                 |
|-------------------|---------------------------------------------------------------------------------------|
| Alternative Name: | Proline Dehydrogenase, Mitochondrial (PRODH) (PRODH Products)                         |
| Background:       | Alternative Names: PDH, PIG6, POX2, PRODH1, PRODH2, SCZD4, TP53I6, p53-induced gene 6 |

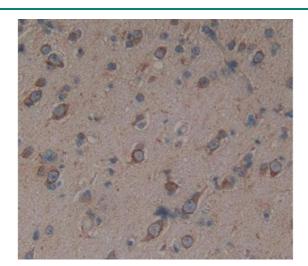

|                     | protein, L-Proline Dehydrogenase, L-Proline(acceptor)Oxidoreductase, Proline Oxidase 1                                                                                                                                                                                                                                                 |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Pathways:           | Response to Water Deprivation, Monocarboxylic Acid Catabolic Process                                                                                                                                                                                                                                                                   |
| Application Details |                                                                                                                                                                                                                                                                                                                                        |
| Application Notes:  | Western blotting: 1:50-400 Immunocytochemistry in formalin fixed cells: 1:50-500 Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistochemistry in paraffin section: 1:10-100 Enzyme-linked Immunosorbent Assay: 1:100-1:5000 Optimal working dilutions must be determined by end user.                          |
| Comment:            | The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37&degC for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition. |
| Restrictions:       | For Research Use only                                                                                                                                                                                                                                                                                                                  |
| Handling            |                                                                                                                                                                                                                                                                                                                                        |
| Format:             | Liquid                                                                                                                                                                                                                                                                                                                                 |
| Concentration:      | Lot specific                                                                                                                                                                                                                                                                                                                           |
| Buffer:             | PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol.                                                                                                                                                                                                                                                                            |
