Datasheet for ABIN5026975  
**Leeporter™ Assay Reagent**

1 Image

### Overview

Quantity:	1 kit
Application:	Luciferase Reporter Gene Assay (LRA)

### Product Details

Purpose:	Luciferase reporter assay reagent
Brand:	Leeporter™
Components:	Substrate, Substrate reconstitution buffer, Assay buffer

### Application Details

**Protocol:** The Leeporter™ Assay Reagent was specifically formulated to use with our Leeporter™ Cell Line products, which was designed to produce highly sensitive signal and prolonged signal intensity. As one-step glow assay reagent, the Leeporter™ Assay Reagent can be directly added to cell culture plates compatible with the luminometer being used without diluting or transferring culture supernatants or cell lysates to other plates.

**Restrictions:** For Research Use only

### Handling

Storage:	-20 °C
Storage Comment:	Store at -20°C
