# Datasheet for ABIN5066409 anti-MPRIP antibody (N-Term) (Atto 488)

3 Images

### Overview

| Quantity:            | 100 µg                                                                                                   |
|----------------------|----------------------------------------------------------------------------------------------------------|
| Target:              | MPRIP                                                                                                    |
| Binding Specificity: | N-Term                                                                                                   |
| Reactivity:          | Human                                                                                                    |
| Host:                | Rabbit                                                                                                   |
| Clonality:           | Polyclonal                                                                                               |
| Conjugate:           | This MPRIP antibody is conjugated to Atto 488                                                            |
| Application:         | Western Blotting (WB), Immunohistochemistry (IHC), Immunofluorescence (IF),<br>Immunocytochemistry (ICC) |

### Product Details

| Immunogen:        | Synthetic peptide from the N-terminal to middle of Human RIP3                                                                                                                       |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| lsotype:          | lgG                                                                                                                                                                                 |
| Specificity:      | Highly expressed in the pancreas. Detected at lower levels in heart, placenta, lung and kidney.<br>Isoform 3 is significantly increased in colon and lung cancers.,Detects ~57 kDa. |
| Cross-Reactivity: | Human, Mouse                                                                                                                                                                        |
| Purification:     | Peptide Affinity Purified                                                                                                                                                           |
| Target Details    |                                                                                                                                                                                     |
| Target:           | MPRIP                                                                                                                                                                               |

### Target Details

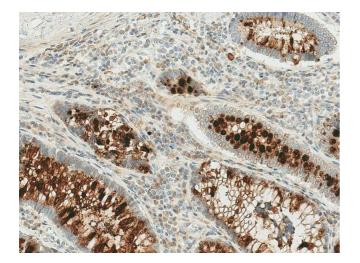

| Alternative Name: | RIP3 (MPRIP Products) |
|-------------------|-----------------------|
| Gene ID:          | 11035                 |
| NCBI Accession:   | NP_006862             |
| UniProt:          | Q9Y572                |

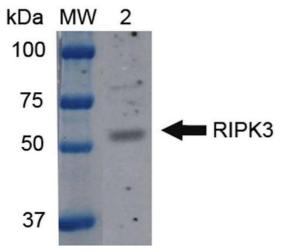

# Application Details

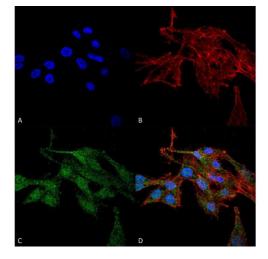

| Application Notes: | <ul> <li>WB (1:1000)</li> <li>ICC/IF (1:100)</li> <li>IHC (1:50)</li> <li>optimal dilutions for assays should be determined by the user.</li> </ul>                                             |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Comment:           | A 1:1000 dilution of ABIN5066409 was sufficient for detection of RIP3 in 15 μg of mouse brain cell lysates by ECL immunoblot analysis using goat anti-rabbit IgG:HRP as the secondary antibody. |
| Restrictions:      | For Research Use only                                                                                                                                                                           |

# Handling

| Format:            | Liquid                                                                                                                 |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Concentration:     | 1 mg/mL                                                                                                                |
| Buffer:            | PBS, 50 % glycerol, 0.09 % sodium azide, Storage buffer may change when conjugated                                     |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | 4 °C                                                                                                                   |
| Storage Comment:   | Conjugated antibodies should be stored at 4°C                                                                          |

#### Immunohistochemistry

**Image 1.** Immunohistochemistry analysis using Rabbit Anti-RIP3 Polyclonal Antibody (ABIN5066409). Tissue: Colon Cancer. Species: Human. Fixation: Formalin Fixed Paraffin-Embedded. Primary Antibody: Rabbit Anti-RIP3 Polyclonal Antibody (ABIN5066409) at 1:50 for 30 min at RT. Counterstain: Hematoxylin. Magnification: 10X. HRP-DAB Detection.

#### Western Blotting

**Image 2.** Western blot analysis of Mouse Brain cell lysates showing detection of ~56.9 kDa RIP3 protein using Rabbit Anti-RIP3 Polyclonal Antibody . Lane 1: Molecular Weight Ladder (MW). Lane 2: Mouse Brain cell lysates. Load: 15 µg. Block: 5% Skim Milk in 1X TBST. Primary Antibody: Rabbit Anti-RIP3 Polyclonal Antibody at 1:1000 for 2 hours at RT. Secondary Antibody: Goat Anti-Rabbit IgG: HRP at 1:1000 for 60 min at RT. Color Development: ECL solution for 6 min in RT. Predicted/Observed Size: ~56.9 kDa.

#### Immunofluorescence (fixed cells)

**Image 3.** Immunocytochemistry/Immunofluorescence analysis using Rabbit Anti-RIP3 Polyclonal Antibody . Tissue: Colon carcinoma cell line (RKO). Species: Human. Fixation: 4% Formaldehyde for 15 min at RT. Primary Antibody: Rabbit Anti-RIP3 Polyclonal Antibody at 1:100 for 60 min at RT. Secondary Antibody: Goat Anti-Rabbit ATTO 488 at 1:100 for 60 min at RT. Counterstain: Phalloidin Texas Red F-Actin stain; DAPI (blue) nuclear stain at 1:1000, 1:5000 for 60 min at RT, 5 min at RT. Localization: Cytoplasm. Magnification: 60X. (A) DAPI nuclear stain. (B) Phalloidin Texas Red F-Actin stain. (C) RIP3 Antibody. (D) Composite.
