antibodies

# Datasheet for ABIN5066886 anti-SCNN1B antibody (AA 617-638) (Biotin)

Overview

| Quantity:            | 100 µg  |
|----------------------|---|
| Target:              | SCNN1B  |
| Binding Specificity: | AA 617-638  |
| Reactivity:          | Rat   |
| Host:                | Mouse   |
| Clonality:           | Monoclonal  |
| Conjugate:           | This SCNN1B antibody is conjugated to Biotin      |
| Application:         | Western Blotting (WB), Immunohistochemistry (IHC) |

### Product Details

| Immunogen:        | Synthetic peptide from the C-terminal of Rat ENaC beta (aa. 617-638) |
|-------------------|--|
| Clone:            | 7B8  |
| Isotype:          | lgG1   |
| Specificity:      | Detects ~87 kDa.   |
| Cross-Reactivity: | Mouse  |
| Purification:     | Protein G Purified   |

#### Target Details

| Target:           | SCNN1B                      |
|-------------------|-----------------------------|
| Alternative Name: | ENaC beta (SCNN1B Products) |

## Target Details

| Background:         | The Epithelial Sodium Channel (ENaC) is a membrane ion channel permeable to Na+ ions. It is          |
|---------------------|--|
|                     | located in the apical plasma membrane of epithelia in the kidneys, lung, colon, and other tissues    |
|                     | where it plays a role in trans epithelial Na+-ion transport (1). Specifically Na+ transport via ENaC |
|                     | occurs across many epithelial surfaces, and plays a key role in regulating salt and water            |
|                     | absorption (2). ENaCs are composed of three structurally related subunits that form a                |
|                     | tetrameric channel, alpha, beta, and gamma. The expression of its alpha and beta subunits is         |
|                     | enhanced as keratinocytes differentiate (3, 4). The beta and gamma-ENaC subunits are                 |
|                     | essential for edema fluid to exert its maximal effect on net fluid absorption by distal lung         |
|                     | epithelia(5). And it has been concluded that the subunits are differentially expressed in the        |
|                     | retina of mice with ocular hypertension, therefore the up-regulation of alpha-ENaC proteins          |
|                     | could serve as a protection mechanism against elevated intraocular pressure (6).                     |
| Gene ID:            | 24767  |
| NCBI Accession:     | NP_036780  |
| UniProt:            | P37090   |
| Application Details |  |
|                     |  |

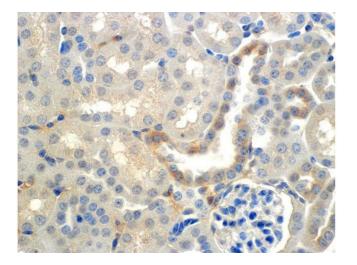

| Application Notes:       | <ul> <li>WB (1:1000)</li> <li>IHC (1:150)</li> <li>optimal dilutions for assays should be determined by the user.</li> </ul>   |
|--------------------------|--|
| Comment:                 | A 1:1000 dilution of ABIN5066886 was sufficient for detection of ENaC beta in 15 µg of Mouse whole kidney lysate by ECL immunoblot analysis using goat anti-mouse IgG:HRP as the secondary antibody. |
| Restrictions:            | For Research Use only  |
| Handling                 |  |
| Format:                  | Liquid   |
| Concentration:           | 1 mg/mL  |
|                          |  |
| Buffer:                  | PBS pH 7.4, 50 % glycerol, 0.09 % sodium azide, Storage buffer may change when conjugated  |
| Buffer:<br>Preservative: | PBS pH 7.4, 50 % glycerol, 0.09 % sodium azide, Storage buffer may change when conjugated Sodium azide   |

### Handling

| Storage:         | 4 °C  |
|------------------|---|
| Storage Comment: | Conjugated antibodies should be stored at 4°C |
