Datasheet for ABIN5505551 Aminoacylase 1 Protein (ACY1) (DYKDDDDK Tag)

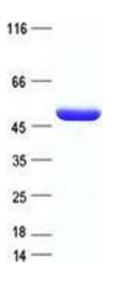

Overview

Quantity:	20 µg
Target:	Aminoacylase 1 (ACY1)
Origin:	Human
Source:	Insect cells (Sf9)
Protein Type:	Recombinant
Purification tag / Conjugate:	This Aminoacylase 1 protein is labelled with DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human Purified recombinant protein of Human aminoacylase 1 (ACY1), transcript variant 1, full length, with C-terminal DDK tag, expressed in sf9, 20 µg (full length, C- term DDK tag, transcript variant 1) protein expressed in Sf9 cells. Produced with end-sequenced ORF clone
Purification:	Purified
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	Aminoacylase 1 (ACY1)
Alternative Name:	aminoacylase 1 (ACY1 Products)
Background:	This gene encodes a cytosolic, homodimeric, zinc-binding enzyme that catalyzes the hydrolysis of acylated L-amino acids to L-amino acids and an acyl group, and has been postulated to

	function in the catabolism and salvage of acylated amino acids. This gene is located on
	chromosome 3p21.1, a region reduced to homozygosity in small-cell lung cancer (SCLC), and
	its expression has been reported to be reduced or undetectable in SCLC cell lines and tumors.
	The amino acid sequence of human aminoacylase-1 is highly homologous to the porcine
	counterpart, and this enzyme is the first member of a new family of zinc-binding enzymes.
	Mutations in this gene cause aminoacylase-1 deficiency, a metabolic disorder characterized by
	central nervous system defects and increased urinary excretion of N-acetylated amino acids.
	Alternative splicing of this gene results in multiple transcript variants. Read-through
	transcription also exists between this gene and the upstream ABHD14A (abhydrolase domain
	containing 14A) gene, as represented in GenelD:100526760. A related pseudogene has been
	identified on chromosome 18.
Molecular Weight:	45.7 kDa
NCBI Accession:	NP_000657
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 μg/mL
Buffer:	50 mM Tris-HCl, pH 8.0, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
