## Target Details

Target:	IGBP1
Alternative Name:	IGBP1 ( <a href="#">IGBP1 Products</a> )
Background:	The proliferation and differentiation of B cells is dependent upon a B-cell antigen receptor (BCR) complex. Binding of antigens to specific B-cell receptors results in a tyrosine phosphorylation reaction through the BCR complex and leads to multiple signal transduction pathways.
Molecular Weight:	39 kDa

## Target Details

NCBI Accession: [NP\\_001542](#)

## Application Details

Application Notes: Recombinant human proteins can be used for:  
Native antigens for optimized antibody production  
Positive controls in ELISA and other antibody assays

Comment: The tag is located at the C-terminal.

Restrictions: For Research Use only
