Datasheet for ABIN5508962  
**HUNK Protein (GST tag)**

### Overview

|                               |   |
|-------------------------------|---|
| Quantity:                     | 10 µg                                       |
| Target:                       | HUNK  |
| Origin:                       | Human                                       |
| Source:                       | Insect Cells                                |
| Protein Type:                 | Recombinant                                 |
| Biological Activity:          | Active                                      |
| Purification tag / Conjugate: | This HUNK protein is labelled with GST tag. |
| Application:                  | Functional Studies (Func)                   |

### Product Details

|                  |                                    |
|------------------|------------------------------------|
| Characteristics: | Recombinant Human HUNK (N-GST tag) |
| Purity:          | 70 % - 90 %                        |

### Target Details

|                   |  |
|-------------------|--|
| Target:           | HUNK                                   |
| Alternative Name: | HUNK ( <a href="#">HUNK Products</a> ) |
| Molecular Weight: | 108                                    |
| NCBI Accession:   | <a href="#">NM_014586</a>              |

## Application Details

---

Application Notes: Optimal working dilution should be determined by the investigator.

---

Restrictions: For Research Use only

---

## Handling

---

Format: Liquid

---

Storage: -80 °C

---

Storage Comment: Store product at -70°C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.
