## Datasheet for ABIN5509430 CCL22 Protein

| Overview                     |                                     |
|------------------------------|-------------------------------------|
| Quantity:                    | 20 µg                               |
| Target:                      | CCL22                               |
| Origin:                      | Mouse                               |
| Source:                      | Escherichia coli (E. coli)          |
| Protein Type:                | Recombinant                         |
| Biological Activity:         | Active                              |
| Application:                 | Functional Studies (Func)           |
| Product Details              |                                     |
| Characteristics:             | Recombinant Mouse CCL22             |
| Purity:                      | >95 % as determined by SDS-PAGE     |
| Endotoxin Level:             | < 1.0 EU of endotoxin/µg of protein |
| Target Details               |                                     |
|                              |                                     |
| Target:                      | CCL22                               |
| Target:<br>Alternative Name: | CCL22<br>CCL22 (CCL22 Products)     |
|                              |                                     |
| Alternative Name:            | CCL22 (CCL22 Products)              |

| Application Details |  |
|---------------------|--|
| Application Notes:  | Optimal working dilution should be determined by the investigator.   |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Lyophilized  |
| Reconstitution:     | A quick spin of the vial followed by reconstitution in sterile distilled water to a concentration not less than 0.1 mg/mL is recommended. Please note, filter sterilization is a must following reconstitution. This solution can then be diluted into other buffers.  |
| Storage:            | 4 °C,-20 °C  |
| Storage Comment:    | The lyophilized protein is stable for at least one year from date of receipt at -70°C. Upon reconstitution, this cytokine can be stored in working aliquots at 2° - 8°C for one month, or at - 20°C for six months, with a carrier protein without detectable loss of activity. Avoid repeated freeze/thaw cycles. |
