### 1 Image

#### Overview

|                          |                                        |
|--------------------------|----------------------------------------|
| Quantity:                | 96 tests                               |
| Target:                  | Intestinal Alkaline Phosphatase (ALPI) |
| Reactivity:              | Cow                                    |
| Method Type:             | Sandwich ELISA                         |
| Detection Range:         | 1.56 ng/mL - 100 ng/mL                 |
| Minimum Detection Limit: | 1.56 ng/mL                             |
| Application:             | ELISA                                  |

#### Product Details

|                    |                                                                                                                                                                                                                                                                                                                     |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purpose:           | For quantitative detection in serum, plasma, tissue homogenates and other biological fluids.                                                                                                                                                                                                                        |
| Sample Type:       | Plasma, Serum, Tissue Homogenate                                                                                                                                                                                                                                                                                    |
| Analytical Method: | Quantitative                                                                                                                                                                                                                                                                                                        |
| Detection Method:  | Colorimetric                                                                                                                                                                                                                                                                                                        |
| Sensitivity:       | 0.938 ng/mL                                                                                                                                                                                                                                                                                                         |
| Components:        | <ul style="list-style-type: none"> <li>- ELISA Microplate</li> <li>- Lyophilized Standard</li> <li>- Sample / Standard Dilution Buffer</li> <li>- Biotin-labeled Antibody (Concentrated)</li> <li>- Antibody Dilution Buffer</li> <li>- HRP-Streptavidin Conjugate(SABC)</li> <li>- SABC Dilution Buffer</li> </ul> |

## Product Details

- TMB Substrate
- Stop Solution
- Wash Buffer (25X)
- Plate Sealer
- Product Description

## Target Details

Target: Intestinal Alkaline Phosphatase (ALPI)

Alternative Name: ALPI ([ALPI Products](#))

UniProt: [P19111](#)

## Application Details

Application Notes: Optimal working dilution should be determined by the investigator.

Comment: Sandwich ELISA, Double Antibody

Sample Volume: 100 µL

Plate: Pre-coated

Restrictions: For Research Use only

## Handling

Storage: 4 °C

Storage Comment: 4 °C for 6 months

Expiry Date: 6 months

**ELISA**

**Image 1.** A typical standard curve
