Overview

Quantity:	96 tests
Target:	GATA2
Reactivity:	Human
Method Type:	DNA-Binding ELISA
Application:	ELISA

Product Details

Purpose:	Human GATA-2 Transcription Factor Activity Assay. This assay uses a dsDNA coated plate with canonical GATA-2 binding sequences to semi-quantitatively detect active GATA-2 in lysates or nuclear extracts. Only available in North America.
Sample Type:	Cell Lysate, Nuclear Extract
Analytical Method:	Semi-Quantitative
Detection Method:	Colorimetric
Specificity:	The olionucleotide/antibody pair provided in this kit recognizes human FRA-2 in whole lysates and nuclear extracts.
Characteristics:	• Specific transcription factor-DNA binding assay • Perfect alternative to EMSA • Easy to perform in an ELISA format • Non-radioactive assay • High throughput (96 well plate format) • Assay can be completed within 5 hours

Product Details

Components:	• 96-well Strip Microplate pre-coated with DNA probes • DNA Binding Buffer • Positive Control Sample • Specific Competitor DNA probe • Non-specific Competitor DNA probe • Assay Reagent • DTT • Wash Buffer • Primary Antibody • HRP-conjugated Secondary Antibody • TMB One-Step Substrate Reagent • Stop Solution
Material not included:	• Distilled or deionized water • 100 mL and 1 liter graduated cylinders • Tubes to prepare sample dilutions Absorbent paper • Precision pipettes to deliver 2 µL to 1 mL volumes • Adjustable 1-25 mL pipettes for reagent preparation • Benchtop rocker or shaker • Microplate reader capable of measuring absorbance at 450 nm

Target Details

Target:	GATA2
Alternative Name:	GATA-2 (GATA2 Products)
Gene ID:	2624
UniProt:	P23769
Pathways:	Stem Cell Maintenance

Application Details

Application Notes:	Optimal working dilution should be determined by the investigator.
Plate:	Pre-coated
Protocol:	1. Prepare all reagents and samples as instructed in the manual. 2. Add 100 µL of sample or positive control to each well. 3. Incubate 2 h at RT or O/N at 4 °C. 4. Add 100 µL of prepared primary antibody to each well. 5. Incubate 1 h at RT. 6. Add 100 µL of prepared HRP-secondary antibody to each well.

Application Details

7. Incubate 1 h at RT.
8. Add 100 µL of TMB One-Step Substrate Reagent to each well.
9. Incubate 30 min at RT.
10. Add 50 µL of Stop Solution to each well.
11. Read at 450 nm immediately.

Restrictions:	For Research Use only

Handling

Storage:	-20 °C
Storage Comment:	Upon receipt, the positive control should be removed and stored at -20° or -80°C. The remainder of the kit can be stored for up to 6 months at 2-8°C from the date of shipment. Opened Microplate Wells or reagents may be stored for up to 1 month at 2° to 8°C. Return unused wells to the pouch containing desiccant pack, reseal along entire edge. Note: The kit can be used within one year if the whole kit is stored at -20°C upon receipt. Avoid repeated freeze-thaw cycles.
Expiry Date:	6 months

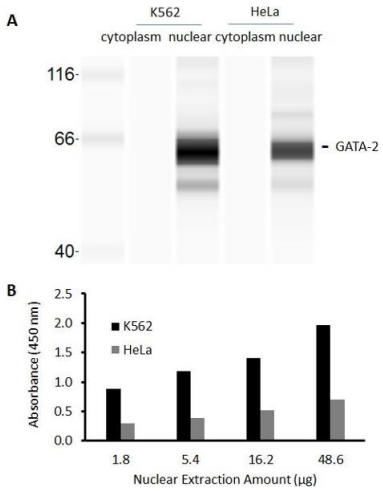
Activity Assay

Image 1. Transcription factor activity assay of GATA-2 from nuclear extracts of K562 cells or HeLa cells with the specific competitor or non-specific competitor. The result shows specific binding of GATA-2 to the GATA conserved binding site detected by using the GATA-2 TF-Activity Assay Kit.



Activity Assay
