## Datasheet for ABIN5532956 anti-NEK4 antibody (C-Term)

2 Images

## Overview

| Quantity:            | 400 μL   |
|----------------------|--|
| Target:              | NEK4   |
| Binding Specificity: | AA 793-824, C-Term   |
| Reactivity:          | Human, Mouse   |
| Host:                | Rabbit   |
| Clonality:           | Polyclonal   |
| Conjugate:           | This NEK4 antibody is un-conjugated  |
| Application:         | Western Blotting (WB), Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)) |
| Product Details      |  |

| Immunogen:    | This NEK4 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 793-824 amino acids from the C-terminal region of human NEK4. |
|---------------|--|
| lsotype:      | Ig Fraction  |
| Purification: | This antibody is purified through a protein A column, followed by peptide affinity purification.   |

## Target Details

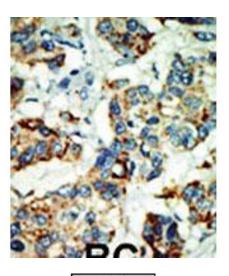

| Target:           | NEK4  |
|-------------------|---|
| Alternative Name: | NEK4 (NEK4 Products)  |
| Background:       | Protein kinases are enzymes that transfer a phosphate group from a phosphate donor,<br>generally the g phosphate of ATP, onto an acceptor amino acid in a substrate protein. By this<br>basic mechanism, protein kinases mediate most of the signal transduction in eukaryotic cells, |

| l'al got b'otano    |  |
|---------------------|--|
|                     | regulating cellular metabolism, transcription, cell cycle progression, cytoskeletal rearrangement<br>and cell movement, apoptosis, and differentiation. With more than 500 gene products, the<br>protein kinase family is one of the largest families of proteins in eukaryotes. The family has<br>been classified in 8 major groups based on sequence comparison of their tyrosine (PTK) or<br>serine/threonine (STK) kinase catalytic domains. The STE group (homologs of yeast Sterile 7,<br>11, 20 kinases) consists of 50 kinases related to the mitogen-activated protein kinase (MAPK)<br>cascade families (Ste7/MAP2K, Ste11/MAP3K, and Ste20/MAP4K). MAP kinase cascades,<br>consisting of a MAPK and one or more upstream regulatory kinases (MAPKKs) have been best |
|                     | characterized in the yeast pheromone response pathway. Pheromones bind to Ste cell surface   |
| Molecular Weight:   | receptors and activate yeast MAPK pathway.<br>95 kDa   |
| Gene ID:            | 6787   |
| UniProt:            | P51957   |
| Application Details |  |
| Application Notes:  | For WB starting dilution is: 1:1000  |
|                     | For IHC-P starting dilution is: 1:50~100   |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Liquid   |
| Concentration:      | 0.5 mg/mL  |
| Buffer:             | Supplied in PBS with 0.09 % (W/V) sodium azide.  |
| Preservative:       | Sodium azide   |
| Precaution of Use:  | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.   |
| Storage:            | 4 °C,-20 °C  |
| Storage Comment:    | Store at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to  |

prolonged high temperatures.

### Immunohistochemistry

**Image 1.** Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by AEC staining. BC = breast carcinoma; HC = hepatocarcinoma.

#### Western Blotting

**Image 2.** Western blot analysis of anti-NEK4 Pab in Y79 cell line lysates (35ug/lane)
