Target Details

Target:	DDX1
Alternative Name:	DDX1 (DDX1 Products)
Background:	Description: DEAD box proteins, characterized by the conserved motif Asp-Glu-Ala-Asp (DEAD),

Target Details

are putative RNA helicases. They are implicated in a number of cellular processes involving alteration of RNA secondary structure such as translation initiation, nuclear and mitochondrial splicing, and ribosome and spliceosome assembly. Based on their distribution patterns, some members of this family are believed to be involved in embryogenesis, spermatogenesis, and cellular growth and division. This gene encodes a DEAD box protein of unknown function. It shows high transcription levels in 2 retinoblastoma cell lines and in tissues of neuroectodermal origin.,
