

# Datasheet for ABIN5564496 Clusterin Protein (CLU) (AA 1-449, Secretory Component) (DYKDDDDK Tag)

Overview

Quantity:	10 µg	
Target:	Clusterin (CLU)	
Protein Characteristics:	AA 1-449, Secretory Component	
Origin:	Human	
Source:	HEK-293 Cells	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This Clusterin protein is labelled with DYKDDDDK Tag.	
Application:	SDS-PAGE (SDS)	

#### Product Details

Purpose:	Clusterin (secretory form) (human) (rec.)
Cross-Reactivity:	Human
Characteristics:	Signal peptide sequence and the human secretory clusterin (aa 1-449) are fused at the C-terminus to a FLAG®-tag.
Purity:	>90 % (SDS-PAGE)
Endotoxin Level:	<0.01EU/µg purified protein (LAL test).
Target Details	
Target:	Clusterin (CLU)

Target.	
Alternative Name:	Clusterin (CLU Products)

### Target Details

Background:	TRPM-2, Apolipoprotein J, APO-J, CLI, CLU, SGP-2	
	Clusterin shares homology with the small heat shock protein family of molecular chaperones.	
	The mature secreted form of the protein is a glycosylated, 80 kDa disulfide-linked heterodimer	
	of alpha and beta subunits (produced by internal cleavage). Clusterin is expressed in virtually all	
	tissues and found in all human fluids. It is involved in numerous physiological processes	
	important for carcinogenesis and tumor growth, including apoptotic cell death, cell cycle	
	regulation, DNA repair, cell adhesion, tissue remodeling, lipid transportation, membrane	
	recycling and immune system regulation. Clusterin also exists as a nuclear protein. The	
	secreted form of Clusterin has extracellular chaperone and anti-apoptotic activities while the	
	nuclear form acts as a proapoptotic factor.	
Molecular Weight:	80kDa (under non-reducing conditions), 39kDa and 40kDa (under reducing conditions) (by SDS-	
	PAGE).	
UniProt:	P10909	
Pathways:	Apoptosis, Negative Regulation of intrinsic apoptotic Signaling	

#### Application Details

Application Notes:	Optimal working dilution should be determined by the investigator.
Restrictions:	For Research Use only

## Handling

Format:	Lyophilized	
Concentration:	Lot specific	
Buffer:	Contains PBS.	
Handling Advice:	After reconstitution, prepare aliquots and store at -20 °C. Avoid freeze/thaw cycles. Centrifuge lyophilized vial before opening and reconstitution. PBS containing at least 0.1 % BSA should be used for further dilutions.	
Storage:	4 °C,-20 °C	
Storage Comment:	Short Term Storage: +4°C Long Term Storage: -20°C Use & Stability: Stable for at least 6 months after receipt when stored at -20°C. Working aliquots are stable for up to 3 months when stored at -20°C.
