## Datasheet for ABIN5564566 CPE ELISA Kit

Image

#### Overview

| Quantity:    | 96 tests       |
|--------------|----------------|
| Target:      | CPE            |
| Reactivity:  | Human          |
| Method Type: | Sandwich ELISA |
| Application: | ELISA          |

#### **Product Details**

| Brand:                 | AssayMax™  |
|------------------------|--|
| Sample Type:           | Cell Culture Cells, Plasma, Serum  |
| Analytical Method:     | Quantitative   |
| Detection Method:      | Colorimetric   |
| Material not included: | Microplate reader capable of measuring absorbance at 405 nm. Pipettes (1-20 μL, 20-200 μL, and multiple channel). Deionized or distilled reagent grade water Incubator (37 °C) |

## Target Details

| Target:   | CPE   |
|-----------|---|
| Abstract: | CPE Products                                  |
| Gene ID:  | 1363  |
| UniProt:  | P16870  |
| Pathways: | Peptide Hormone Metabolism, Synaptic Membrane |

### Application Details

| Assay Time:             | 4 h   |
|-------------------------|---|
| Plate:                  | Pre-coated  |
| Calculation of Results: | <ul> <li>Calculate the mean value of the duplicate or triplicate readings for each standard and sample.</li> <li>To generate a standard curve, plot the graph using the standard concentrations on the x-axis and the corresponding mean 450 nm absorbance (OD) on the y-axis. The best-fit line can be determined by regression analysis using log-log or four-parameter logistic curve-fit.</li> <li>Determine the unknown sample concentration from the standard curve and multiply the value by the dilution factor.</li> </ul> |
| Restrictions:           | For Research Use only   |
| Handling                |   |
| Handling Advice:        | This product is for Research Use Only and is Not For Use In Diagnostic Procedures. Prepare all<br>reagents (working diluent buffer, wash buffer, standard, biotinylated antibody, and SP<br>Conjugate) as instructed, prior to running the assay. Prepare all samples prior to running the<br>assay. The dilution factors for the samples are suggested in this insert. However, the user<br>should determine the optimal dilution factor. Spin down the SP Conjugate vial and the  |
|                         | biotinylated antibody vial before opening and using contents. The Stop Solution is an acidic solution. The kit should not be used beyond the expiration date. 2   |
