**anti-EIF5A antibody (AA 1-154) (PerCP)**[Go to Product page](#)

## Overview

|                      |                                            |
|----------------------|--------------------------------------------|
| Quantity:            | 150 µg                                     |
| Target:              | EIF5A                                      |
| Binding Specificity: | AA 1-154                                   |
| Reactivity:          | Human                                      |
| Host:                | Rabbit                                     |
| Clonality:           | Polyclonal                                 |
| Conjugate:           | This EIF5A antibody is conjugated to PerCP |
| Application:         | Flow Cytometry (FACS)                      |

## Product Details

|                  |                                                              |
|------------------|--------------------------------------------------------------|
| Brand:           | AssayLite™                                                   |
| Immunogen:       | Human eIF5A (1-154aa) expressed in E. coli.                  |
| Characteristics: | Purified antibody validated for specificity and sensitivity. |
| Purification:    | Affinity Purified                                            |

## Target Details

|                   |                                                                                                  |
|-------------------|--------------------------------------------------------------------------------------------------|
| Target:           | EIF5A                                                                                            |
| Alternative Name: | Eukaryotic Translation Initiation Factor 5A Isoform B (eIF5A) ( <a href="#">EIF5A Products</a> ) |
| Gene ID:          | 1984                                                                                             |
| UniProt:          | <a href="#">P63241</a>                                                                           |

### Target Details

Pathways: [Regulation of Muscle Cell Differentiation](#)

### Application Details

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

### Handling

Format: Lyophilized

Buffer: Lyophilized from PBS pH 7.4, 20 mg/mL BSA, and 0.02 % Sodium Azide

Preservative: Sodium azide

Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
