## Overview

|                      |                                           |
|----------------------|-------------------------------------------|
| Quantity:            | 150 µg                                    |
| Target:              | KAP1 (TRIM28)                             |
| Binding Specificity: | AA 366-802                                |
| Reactivity:          | Human                                     |
| Host:                | Rabbit                                    |
| Clonality:           | Polyclonal                                |
| Conjugate:           | This KAP1 antibody is conjugated to PerCP |
| Application:         | Flow Cytometry (FACS)                     |

## Product Details

|                  |                                                              |
|------------------|--------------------------------------------------------------|
| Brand:           | AssayLite™                                                   |
| Immunogen:       | Human KAP-1 (366-802 aa) expressed in E. coli                |
| Characteristics: | Purified antibody validated for specificity and sensitivity. |
| Purification:    | Affinity Purified                                            |

## Target Details

|                   |                                                                                                             |
|-------------------|-------------------------------------------------------------------------------------------------------------|
| Target:           | KAP1 (TRIM28)                                                                                               |
| Alternative Name: | KRAB-associated Protein 1 (KAP-1) ( <a href="#">TRIM28 Products</a> )                                       |
| Gene ID:          | 10155                                                                                                       |
| Pathways:         | <a href="#">Hedgehog Signaling</a> , <a href="#">Positive Regulation of Response to DNA Damage Stimulus</a> |

Application Details

|                    |                                                                    |
|--------------------|--------------------------------------------------------------------|
| Application Notes: | Optimal working dilution should be determined by the investigator. |
| Restrictions:      | For Research Use only                                              |

Handling

|                    |                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Format:            | Lyophilized                                                                                                            |
| Buffer:            | Lyophilized from PBS pH 7.4, 20 mg/mL BSA, and 0.02 % Sodium Azide                                                     |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
