Datasheet for ABIN5570766 Ribonuclease T1 Protein

Overview

Quantity:	100 kU
Target:	Ribonuclease T1
Origin:	Fusarium
Source:	Fungi
Protein Type:	Native
Biological Activity:	Active

Product Details

Purpose:	Ribonuclease T1 (<i>A. oryzae</i>)
Characteristics:	<p>Solution. Animal Free highly purified, microbial (non-mammalian) broad specificity RNase prepared with non-animal components.</p> <p>This product with activity data is belong to bioactive protein.</p>
Purification:	Native protein purified from Aspergillus oryzae

Target Details

Target:	Ribonuclease T1
Abstract:	Ribonuclease T1 Products

Application Details

Application Notes:	Ribonuclease T1 Assay, RNA mapping and structure studies, Removal of RNA from DNA preparations, RNA protection assays, RNA sequencing.
--------------------	--

Application Details

Comment:	Native protein purified from <i>Aspergillus oryzae</i>
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	In 2.8 M ammonium sulfate.
Handling Advice:	Aliquot to avoid repeated freezing and thawing.
Storage:	4 °C
