Datasheet for ABIN5571421

Acid Phosphatase Protein (ACP)

Overview

Quantity:	1 g
Target:	Acid Phosphatase (ACP)
Origin:	Wheat germ
Source:	Wheat germ
Protein Type:	Native
Biological Activity:	Active

Product Details

Purpose:	Acid phosphatase (Wheat Germ)
Characteristics:	Lyophilized. Partially purified. Also active as a lipase. This product with activity data is belong to bioactive protein.
Purification:	Native protein partially purified from Wheat Germ to the 0.35-0.55 fraction by the method described by Singer, J. Biol. Chem., 174, 11 (1948)

Target Details

Target:	Acid Phosphatase (ACP)
Alternative Name:	Acid phosphatase (ACP Products)

Application Details

Application Notes:	Acid Phosphatase Assay
Comment:	Native protein partially purified from Wheat Germ to the 0.35-0.55 fraction by the method

Application Details

	described by Singer, J. Biol. Chem., 174, 11 (1948)
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Handling Advice:	Aliquot to avoid repeated freezing and thawing.
Storage:	-20 °C
