Datasheet for ABIN5571433 Cellulase Protein (Cellulase)

Overview

| | |
|----------------------|-----------|
| Quantity: | 250 mg |
| Target: | Cellulase |
| Origin: | Fusarium |
| Source: | Fungi |
| Protein Type: | Native |
| Biological Activity: | Active |

Product Details

| | |
|------------------|--|
| Purpose: | Cellulase (<i>T. reesei</i>) |
| Characteristics: | Lyophilized. Dialyzed. Lipase, protease, and nuclease free. A complex containing exo- and endoglucanase activities. This product with activity data is belong to bioactive protein. |
| Purification: | Native protein chromatographically purified from <i>Trichoderma reesei</i> ATCC#26921 |

Target Details

| | |
|-------------------|--|
| Target: | Cellulase |
| Alternative Name: | Cellulase (Cellulase Products) |

Application Details

| | |
|--------------------|---|
| Application Notes: | Cellulase Assay |
| Comment: | Native protein chromatographically purified from <i>Trichoderma reesei</i> ATCC#26921 |

Application Details

Restrictions: For Research Use only

Handling

Format: Lyophilized

Handling Advice: Aliquot to avoid repeated freezing and thawing.

Storage: 4 °C
