Datasheet for ABIN5571441  
**Clostripain Protein (closl)**

### Overview

Quantity: 1 mg

Target: Clostripain (closl)

Origin: Clostridium

Source: Clostridium

Protein Type: Native

Biological Activity: Active

### Product Details

Purpose: Clostripain (*Cl. Histolyticum*)

Characteristics: Lyophilized. Dialyzed. Pre-activated.  
This product with activity data is belong to bioactive protein.

Purification: Native protein chromatographically purified from Clostridium histolyticum

### Target Details

Target: Clostripain (closl)

Alternative Name: Clostripain ([closl Products](#))

### Application Details

Application Notes: Clostripain Assay, Peptide mapping, Sequence analysis, Cell isolation, Hydrolysis/condensation of amide bonds, Peptide synthesis.

Comment: Native protein chromatographically purified from *Clostridium histolyticum*

## Application Details

---

Restrictions: For Research Use only

## Handling

---

Format: Lyophilized

Handling Advice: Aliquot to avoid repeated freezing and thawing.

Storage: 4 °C
