Datasheet for ABIN5571448

DLD Protein

Overview

Quantity:	1000 units
Target:	DLD
Origin:	Clostridium
Source:	Clostridium
Protein Type:	Native
Biological Activity:	Active

Product Details

Purpose:	Diaphorase (<i>Cl. Kluyveri</i>)
Characteristics:	Lyophilized. Dialyzed. This product with activity data is belong to bioactive protein.
Purification:	Native protein purified from Cl. kluyveri

Target Details

Target:	DLD
Alternative Name:	Diaphorase (DLD Products)
Pathways:	Ribonucleoside Biosynthetic Process , Cell RedoxHomeostasis

Application Details

Application Notes:	Diaphorase Assay
--------------------	------------------

Application Details

Comment:	Native protein purified from <i>Cl. kluyveri</i>
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Handling Advice:	Due to the presence of FMN (flavin mononucleotide), the enzyme, especially in solution, is light-sensitive.
Storage:	4 °C,-20 °C
