Datasheet for ABIN5571471 NEU1 Protein

Overview

Quantity:	5 units
Target:	NEU1
Origin:	Clostridium
Source:	Clostridium
Protein Type:	Native
Biological Activity:	Active

Product Details

Purpose:	Neuraminidase (<i>C. perfringens</i>)
Characteristics:	Lyophilized. Purified. Contaminating proteolytic activity $\leq 0.1\%$ using trypsin as the standard. This product with activity data is belong to bioactive protein.
Purification:	Native protein chromatographically purified from Clostridium perfringens

Target Details

Target:	NEU1
Alternative Name:	Neuraminidase (NEU1 Products)
Pathways:	SARS-CoV-2 Protein Interactome

Application Details

Application Notes:	Neuraminidase Assay, Study of glycoproteins in protein chemistry and cell biology.
--------------------	--

Application Details

Comment:	Native protein chromatographically purified from <i>Clostridium perfringens</i>
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Buffer:	Contains 50 % (w/w) sucrose.
Handling Advice:	Aliquot to avoid repeated freezing and thawing.
Storage:	4 °C
