**anti-MST1R antibody (pTyr1360)**

[Go to Product page](#)

1 Image

## Overview

Quantity:	100 µg
Target:	MST1R
Binding Specificity:	pTyr1360
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Application:	Western Blotting (WB), ELISA

## Product Details

Purpose:	RON phospho Y1360 Antibody
Immunogen:	Immunogen: Anti-RON pY1360 Antibody was produced in rabbits by repeated immunizations with a synthetic peptide corresponding to residues surrounding Y1360 of human RON protein. Immunogen Type: Conjugated Peptide
Isotype:	IgG
Cross-Reactivity (Details):	Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rabbit Serum.
Characteristics:	Synonyms: rabbit anti-RON pY1360 antibody, Macrophage-stimulating protein receptor, MSP receptor, Protein-tyrosine kinase 8, p185-Ron, PTK8, RON, c-met-related tyrosine kinase, CD136
Purification:	Anti-RON pY1360 was prepared from monospecific antiserum by immunoaffinity chromatography using phospho peptide coupled to agarose beads followed by solid phase adsorptions against non-phospho peptide and non-specific peptide to remove any unwanted reactivities.

## Product Details

Sterility: Sterile filtered

## Target Details

Target: MST1R

Alternative Name: MST1R ([MST1R Products](#))

Background: Background: RON pY1360 antibody detects phosphorylated RON. RON is a member of the protein kinase superfamily. Protein kinases mediate most of the signal transduction in eukaryotic cells, regulating cellular metabolism, transcription, cell cycle progression, cytoskeletal rearrangement and cell movement, apoptosis, and differentiation. RON is a heterodimer composed of an  $\alpha$  chain and a  $\beta$  chain. The  $\alpha$  chain is completely extracellular, whereas the  $\beta$  chain traverses the cell membrane and contains the intracellular tyrosine kinase and regulatory elements. Anti-RON Antibody is ideal for investigators involved in Cell Signaling, Cancer, Neuroscience and Signal Transduction research.

Gene ID: 4486

NCBI Accession: [NP\\_002438](#)

UniProt: [Q04912](#)

Pathways: [RTK Signaling](#)

## Application Details

Application Notes: Application Note: Anti-RONpY1360 Antibody has been tested for use in ELISA and by western blot. Specific conditions for reactivity should be optimized by the end user. Expect a predominant band at ~ 152.3 kDa corresponding to full length protein by western blotting in the appropriate cell lysate or extract. This phospho-specific polyclonal antibody reacts with human RON pY1360 and shows minimal reactivity by ELISA against the non-phosphorylated form of the immunizing peptide.

Western Blot Dilution: 1:500-1:2000

ELISA Dilution: 1:2,000 - 1:10,000

Other: User Optimized

Restrictions: For Research Use only

## Handling

Format: Liquid

Handling

Concentration:	0.79 mg/mL
Buffer:	Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 Stabilizer: None Preservative: 0.01 % (w/v) Sodium Azide
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	4 °C,-20 °C
Storage Comment:	Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiry Date:	12 months

Western Blotting

**Image 1.** Western Blot of Rabbit anti-RONpY1360 antibody. Lane 1: Phospho RON rProtein (cytoplasmic domain). Lane 2: Phospho RON rProtein (cytoplasmic domain) incubated with RONpY1360 peptide. Load: 0.05 µg per lane. Primary antibody: RON pY1360 antibody at 1µg for overnight at 4°C. Secondary antibody: HRP Goat anti-rabbit IgG secondary antibody at 1:40,000 for 45 min at RT. Block: ABIN925618 Fluorescent blocking buffer overnight at 4°C. Predicted/Observed size: 152 kDa (full legnth) /~75 kDa (cytoplasmic domain) RON pY1360. Other band(s): none.
