Target Details

Abstract:	Protein A Products
Background:	Synonyms: BAC, Protein A Biotin, Anti-Protein A BAC Antibody
	Background: Biotin is widely used throughout the biotechnology industry to conjugate proteins
	for biochemical assays. Biotin's small size typically does not affect the biological activity of
	protein upon biotinylation. Biotinylated proteins of interest can be enriched from a sample due
	to highly stable interactions. Biotin conjugated anti-Protein A antibodies are used as an
	amplifying reagent in immunohistochemistry, microarray assays, ELISAs, blots, and other
	applications.

Application Details

Application Notes:	Immunohistochemistry Dilution: 1:500-1:2,500
	Application Note: Anti-Protein A Biotin Conjugated has been assayed against 1.0 µg of Protein A
	in a standard capture ELISA using Peroxidase Conjugated Streptavidin #S000-03 and ABTS
	(2,2'-azino-bis-[3-ethylbenthiazoline-6-sulfonic acid]) code # ABTS-100 as a substrate for
	30 minutes at room temperature. A working dilution of 1:4,000 to 1:20,000 of the reconstitution
	concentration is suggested for this product.
	Western Blot Dilution: 1:1,000-1:5,000
	ELISA Dilution: 1:2,000-1:10,000
Restrictions:	For Research Use only
