Target Details

Abstract:	IgA Products
Target Type:	Antibody
Background:	Synonyms: Goat Anti Rat IgA (alpha chain) Antibody Texas Red™ Conjugated, Goat Anti-Rat IgA
	alpha Texas Red™ Conjugated Antibody
	Background: Anti-Rat IgA Texas Red™ Antibody generated in goat detects immunoglobulin A
	heavy chain from rat. Immunoglobulin A (IgA) is an antibody that plays a critical role in mucosa
	immunity. IgA has two subclasses (IgA1 and IgA2) and can exist in a dimeric form called
	secretory IgA (sIgA). Secondary Antibodies are available in a variety of formats and conjugate
	types. When choosing a secondary antibody product, consideration must be given to species
	and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-
	reactivity, and host-species source and fragment composition. This Anti-Rat IgA is conjugated
	to Texas Red™.
