Rabbit anti-Mouse IgG Antibody (HRP) - Preadsorbed

Image

Overview	
Quantity:	100 μg
Target:	IgG
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	HRP
Application:	ELISA, Immunohistochemistry (IHC), Western Blotting (WB)
Product Details	
Immunogen:	Immunogen: Highly purified mouse IgG gamma 1, gamma 2a, gamma 2b and gamma 3
	proteins
	Immunogen Type: Native Protein
Isotype:	lgG
Characteristics:	This Anti-Mouse IgG subclass pan reactive Secondary Antibody is is designed for Western
	Blotting, ELISA and Immunohistochemistry. HRP conjugated secondary antibodies can also be
	used for a variety of other applications such as Assay Development.
Purification:	Preadsorption: Solid phase absorption
Target Details	
Target:	IgG
Abstract:	IgG Products

Target Details

Reconstitution:

Concentration:

Target Type:	Antibody
Background:	Synonyms: rabbit anti-Mouse IgG (gamma 1, 2a, 2b and 3 chain) Antibody peroxidase
	conjugation, rabbit anti-Mouse IgG HRP conjugated Antibody
	Background: Anti-Mouse IgG Peroxidase Antibody generated in rabbit detects reactivity to
	Mouse IgG1, IgG2a, IgG2b and IgG3. Secreted as part of the adaptive immune response by
	plasma B cells, immunoglobulin G constitutes 75 % of serum immunoglobulins.
	Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction o
	neutralization via agglutination (and thereby immobilizing them), activation of the compliment
	cascade, and opsinization for phagocytosis. The whole IgG molecule possesses both the F(c)
	region, recognized by high-affinity Fc receptor proteins, as well as the F(ab) region possessing
	the epitope-recognition site. IgG1, IgG2a, IgG2b and IgG3 chains of the antibody molecule are
	present. Secondary Antibodies are available in a variety of formats and conjugate types. When
	choosing a secondary antibody product, consideration must be given to species and
	immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-
Annlication Details	reactivity, and host-species source and fragment composition.

Reconstitution Buffer: Restore with deionized water (or equivalent)

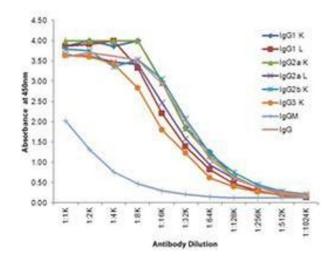

Reconstitution Volume: 100 μ L

1.0 mg/mL

Handling

Buffer:	Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
	Stabilizer: 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
	Preservative: 0.01 % (w/v) Gentamicin Sulfate
Preservative:	Gentamicin sulfate
Precaution of Use:	This product contains Gentamicin sulfate: a POISONOUS AND HAZARDOUS SUBSTANCE which
	should be handled by trained staff only.
Storage:	RT,4 °C,-20 °C
Storage: Storage Comment:	RT,4 °C,-20 °C Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C
	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C
	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after
