

Datasheet for ABIN5608155

Overview

Target Details

lgΑ

Target:

Rabbit anti-Human IgA (Heavy Chain) Antibody (TRITC) - Preadsorbed

Quantity: 1 mg Target: lgΑ Binding Specificity: Heavy Chain Reactivity: Human Rabbit Host: Clonality: Polyclonal Conjugate: **TRITC** Application: Flow Cytometry (FACS), FLISA, Fluorescence Microscopy (FM) **Product Details** Immunogen: Immunogen: Human IgA alpha heavy chain Isotype: lgG Characteristics: This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. Purification: Preadsorption: Solid phase absorption Labeling Ratio: 2.3

Target Details

Abstract:	IgA Products
Target Type:	Antibody
Background:	Synonyms: rabbit anti-Human IgA (alpha chain) rhodamine conjugated Antibody, rabbit anti-Human IgA alpha Antibody TRITC conjugation Background: Anti-Human IgA Rhodamine Antibody generated in rabbit detects immunoglobulin A (alpha chain) from human. Immunoglobulin A (IgA) is an antibody that plays a critical role in mucosal immunity. IgA has two subclasses (IgA1 and IgA2) and can exist in a dimeric form called secretory IgA (sIgA). Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition.

Application Details

Application Notes:	Application Note: Anti-Human IgA Rhodamine Antibody is designed for immunofluorescence
	microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This
	product is also suitable for multiplex analysis, including multicolor imaging, utilizing various
	commercial platforms.
	FLISA Dilution: 1:10,000 - 1:50,000
	Flow Cytometry Dilution: 1:500 - 1:2,500
	IF Microscopy Dilution: 1:1,000 - 1:5,000

For Research Use only

Handling

Restrictions:

Format:	Lyophilized
Reconstitution:	Reconstitution Volume: 1.0 mL Reconstitution Buffer: Restore with deionized water (or equivalent)
Concentration:	1.0 mg/mL
Buffer:	Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 Stabilizer: 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free Preservative: 0.01 % (w/v) Sodium Azide
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which

Handling

	should be handled by trained staff only.
Storage:	RT,4 °C,-20 °C
Storage Comment:	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiry Date:	12 months
