Target Details

Target:	MED26
Alternative Name:	Med26 (MED26 Products)
Background:	Synonyms: CRSP70, ARC70, Mediator of RNA polymerase II transcription subunit 26, MED26 Background: Component of the Mediator complex, a coactivator involved in the regulated transcription of nearly all RNA polymerase II-dependent genes. Mediator functions as a bridge to convey information from gene-specific regulatory proteins to the basal RNA polymerase II

Target Details

transcription machinery. Mediator is recruited to promoters by direct interactions with regulatory proteins and serves as a scaffold for the assembly of a functional pre-initiation complex with RNA polymerase II and the general transcription factors.
