

Datasheet for ABIN5623958

Gelatinase Protein (gelE) (AA 193-510) (His-SUMO Tag)

[Go to Product page](#)

Overview

Quantity:	100 µg
Target:	Gelatinase (gelE)
Protein Characteristics:	AA 193-510
Origin:	Bacteria
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This Gelatinase protein is labelled with His-SUMO Tag.

Product Details

Sequence:	Amino acids 193-510, full length protein with N-terminal 6x His-SUMO-tag.
Characteristics:	Recombinant Enterococcus faecalis Gelatinase (gelE)
Purity:	> 90 % pure

Target Details

Target:	Gelatinase (gelE)
---------	-------------------

Application Details

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Format:	Lyophilized
---------	-------------

Handling

Buffer: Lyophilized from Tris-based buffer

Storage: 4 °C/-20 °C

Storage Comment: Store at 4 deg C short term, -20 deg C long term. Avoid repeated freeze thaw cycles.
