Datasheet for ABIN5623961

LASB Protein (AA 198-498) (His-SUMO Tag)

Overview

Quantity:	100 µg
Target:	LASB
Protein Characteristics:	AA 198-498
Origin:	Bacteria
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This LASB protein is labelled with His-SUMO Tag.

Product Details

Sequence:	Amino acids: 198-498 partial protein with N-terminal 6xHis-SUMO-tag.
Characteristics:	Recombinant Pseudomonas aeruginosa Pseudolysin (lasB) protein
Purity:	> 90 % pure

Target Details

Target:	LASB
Alternative Name:	Pseudolysin (lasB)

Application Details

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Format:	Lyophilized
Buffer:	Lyophilized from a Tris-based buffer
Storage:	-20 °C/-80 °C
Storage Comment:	Store at -20 deg C short term, -70 deg C long term. Avoid repeated freeze thaw cycles.
