

Datasheet for ABIN5624006  
**CD4 Protein (CD4)**

[Go to Product page](#)

## Overview

|               |                              |
|---------------|------------------------------|
| Quantity:     | 100 µg                       |
| Target:       | CD4                          |
| Origin:       | Human                        |
| Source:       | CHO Cells                    |
| Protein Type: | Recombinant                  |
| Application:  | Western Blotting (WB), ELISA |

## Product Details

|                  |                                        |
|------------------|----------------------------------------|
| Characteristics: | Purified recombinant Human CD4 protein |
| Purification:    | Purified                               |
| Purity:          | > 95 % pure                            |

## Target Details

|                   |                                                                                                                                   |
|-------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| Target:           | CD4                                                                                                                               |
| Alternative Name: | CD4 ( <a href="#">CD4 Products</a> )                                                                                              |
| Pathways:         | <a href="#">TCR Signaling</a> , <a href="#">Maintenance of Protein Location</a> , <a href="#">CXCR4-mediated Signaling Events</a> |

## Application Details

|                    |                             |
|--------------------|-----------------------------|
| Application Notes: | ELISA: 1 µg/mL, WB: 1 µg/mL |
| Restrictions:      | For Research Use only       |

Handling

---

|                  |                                                                                   |
|------------------|-----------------------------------------------------------------------------------|
| Buffer:          | Supplied lyophilized in 50 mM MES, pH 6.0, 350 mM NaCl buffer                     |
| Storage:         | 4 °C/-80 °C                                                                       |
| Storage Comment: | Store at 2-8 deg C, freeze reconstituted product in working aliquots at -70 deg C |
