Overview

Quantity:	10 μg
Target:	AKT3
Origin:	Human
Source:	Baculovirus infected Insect Cells
Protein Type:	Recombinant
Application:	Western Blotting (WB)

Product Details

Purification:

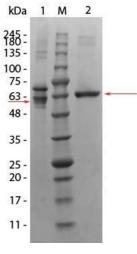

Recombinant protein corresponds to amino acids 1 to 481 of mature human AKT3, Akt isoform 3. The recombinant protein contains a polyhistidine affinity tag at the amino terminus. This protein was co-expressed with the p110 kinase domain leading to phosphorylation of key residues T308 and S473. Purity is greater than 90% as determined by reducing and non-reducing SDS-PAGE and by analytical HPLC.

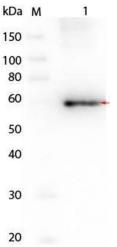

Target Details

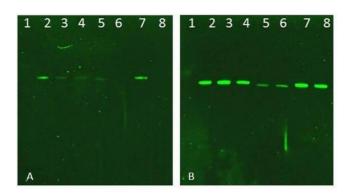

Target:	AKT3
Alternative Name:	AKT3 Protein (AKT3 Products)
Gene ID:	10000
UniProt:	Q9Y243
Pathways:	PI3K-Akt Signaling, RTK Signaling, TLR Signaling, Hepatitis C, VEGF Signaling

Application Details

Application Notes: Application Note: AKT3 is suitable as a control for polyclonal or monoclonal anti-AKT immunological assays. Akt3 recombinant protein is expected to be phosphorylated active state. It is well suited as a control for anti-AKT pT308 which detects phosphorylated S473. For western b 50 ng or less. For other assays concentration is user optimized.
