Datasheet for ABIN5647902 anti-Peptide YY antibody (AA 29-64)

5 Images

Overview

Quantity:	100 µg
Target:	Peptide YY (PYY)
Binding Specificity:	AA 29-64
Reactivity:	Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Peptide YY antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (Paraffin-embedded Sections) (IHC (p))

Product Details

Immunogen:	Amino acids 29-64 (YPAKPEAPGEDASPEELSRYYASLRHYLNLVTRQRY) from the mouse protein were used as the immunogen for the PYY antibody.
Isotype:	lgG
Purification:	Antigen affinity purified

Target Details

Target:	Peptide YY (PYY)
Alternative Name:	PYY / Peptide YY (PYY Products)
Background:	Peptide YY (PYY), also known as peptide tyrosine tyrosine, is a peptide that in humans is encoded by the PYY gene. This gene encodes a member of the neuropeptide Y (NPY) family of
	peptides. The encoded preproprotein is proteolytically processed to generate two alternative

Target Details

	peptide products that differ in length by three amino acids. These peptides, secreted by
	endocrine cells in the gut, exhibit different binding affinities for each of the neuropeptide Y
	receptors. Binding of the encoded peptides to these receptors mediates regulation of
	pancreatic secretion, gut mobility and energy homeostasis. Rare variations in this gene could
	increase susceptibility to obesity and elevated serum levels of the encoded peptides may be
	associated with anorexia nervosa.
UniProt:	Q9EPS2

Application Details

Application Notes:	Western blot: 0.5-1 µg/mL,IHC (FFPE): 1-2 µg/mL
Restrictions:	For Research Use only
Handling	
Buffer:	0.5 mg/mL if reconstituted with 0.2 mL sterile DI water
Storage:	-20 °C
Storage Comment:	Prior to reconstitution, store at 4°C. After reconstitution, the PYY antibody can be stored for up
	to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and
	thawing.
