Datasheet for ABIN5650936 anti-SNCA antibody (pSer129)

5 Images

Overview

Quantity:	100 µL			
Target:	SNCA			
Binding Specificity:	AA 40-140, pSer129			
Reactivity:	Human, Mouse, Rat			
Host:	Rabbit			
Clonality:	Polyclonal			
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (IHC), Immunofluorescence (IF), Immunocytochemistry (ICC)			
Product Details				
Immunogen:	Synthetic peptide of Human Alpha Synuclein pSer129 (40-140 aa), conjugated to Keyhole Limpet Haemocyanin (KLH).			
Specificity:	Binds to phosphorylated serine 129 on alpha synuclein. Does not detect unphosphorylated serine 129 alpha synuclein. Detects bands at 100, 75, 45, 15 kDa. Bands above 15 kDa are			

Purification:

oligomers.

Peptide Affinity Purified

Target Details

Target:	SNCA	
Alternative Name:	Alpha Synuclein (SNCA Products)	
Background:	ackground: Alpha-Synuclein (SNCA) is expressed predominantly in the brain, where it is concentrated

	presynaptic nerve terminals (1). Alpha-synuclein is highly expressed in the mitochondria o					
	olfactory bulb, hippocampus, striatum and thalamus (2). Functionally, it has been shown to					
	significantly interact with tubulin (3), and may serve as a potential microtubule-associated					
	protein. It has also been found to be essential for normal development of the cognitive					
	functions, inactivation may lead to impaired spatial learning and working memory (4). SNCA					
	fibrillar aggregates represent the major non A-beta component of Alzheimers disease amyloid					
	plaque, and a major component of Lewy body inclusions, and Parkinson's disease. Parkinson's					
	disease (PD) is a common neurodegenerative disorder characterized by the progressive					
	accumulation in selected neurons of protein inclusions containing alpha-synuclein and ubiquiti					
	(5, 6). Alpha synuclein phosphorylated at serine 129 constitutes 90 % of the alpha synuclein					
	found in Lewy bodies (7, 8).					
	found in Lewy bodies (7, 8).

Application Details

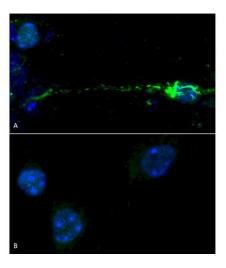

Application Notes:	 WB (1:1000) ICC/IF (1:500) optimal dilutions for assays should be determined by the user. 			
Comment:	A 1:1000 dilution of ABIN5650936 was sufficient for detection of Alpha Synuclein pSer129 in 15 µg of human brain cell lysates by ECL immunoblot analysis using goat anti-rabbit IgG:HRP as the secondary antibody.			
Restrictions:	For Research Use only			
Handling				
Format:	Liquid			
Concentration:	0.5 mg/mL			
Buffer:	PBS pH 7.4, 50 % glycerol, 0.09 % Sodium Azide

Handling

Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C

Immunocytochemistry

Image 1. Phospho serine 129 antibody (ABIN5650936) was used to detect phosphorylated alpha synuclein in primary mouse hippocampal neurons treated with 100 nM sonicated mouse alpha synuclein PFFs (ABIN5651245) (A). Phosphorylated alpha synuclein was visible in perinucleus and neurites compared to untreated control (B). Read the protocol at pabmabs.com/?p=7901. Image courtesy of Trine Rasmussen, Simon Molgaard Jensen at Aarhus University.

Western Blotting

Image 2. Western blot analysis of Human, Mouse brain lysate showing detection of ~16 kDa Alpha Synuclein pSer129 protein using Rabbit Anti-Alpha Synuclein pSer129 Polyclonal Antibody (ABIN5650936). Lane 1: Molecular Weight Ladder (MW). Lane 2: Human brain lysate. Lane 3: Mouse brain lysate. Lane 4: Alpha Synuclein Monomer (0.5μ g). Load: 15 µg. Block: 2.5 % BSA in TBST. Primary Antibody: Rabbit Anti-Alpha Synuclein pSer129 Polyclonal Antibody (ABIN5650936) at 1:1000 for 2 hours at RT. Secondary Antibody: Goat Anti-Rabbit HRP:IgG at 1:3000 for 1 hour at RT. Color Development: ECL solution for 5 min at RT. Predicted/Observed Size: ~16 kDa. Other Band(s): 100, 75, 45, 30,16 kDa.

Immunohistochemistry

Image 3. Immunohistochemistry analysis using Rabbit Anti-Alpha Synuclein (pSer129) Polyclonal Antibody (ABIN5650936). Tissue: Free floating brain sections. Species: Mouse. Fixation: PFA. Primary Antibody: Rabbit Anti-Alpha Synuclein (pSer129) Polyclonal Antibody (ABIN5650936) at 1:500 for Overnight at 4C with gentle agitation. Counterstain: Hoechst. Magnification: 63X. A) Right hemisphere (striatum) injected with alpha synuclein AAV vector. B) Control. Alpha synuclein streaks are visible at injection site. Courtesy of: Trine Rasmussen, Simon Molgaard Jensen, Aarhus University.
